A: Here you go :) My utility: It can convert older versions (10/11) to more recent version (10.3+) of.rar files. The.rar files need to be unpacked. To start: python ConvertRAR.py --unpack rar-file.rar --convert-type 9.5.3 --version-type 10.5 There are two optional arguments, the 3rd and 4th can be used for the version type. The version and type are separated by a space. The 4th optional argument is the original version number: e.g. 9.5.3 might be written 9.5_3. The 3rd optional argument is the version type: e.g. 9.5_3 might be written 9.5.3. The default is to convert the.rar file to a version 10.5 file and for a version 9.5.3 it will produce a.9.5_3 file. This is all documented in the description: You need: python3 python-arcgisscripting>= 1.7.0 Also see: WATCH: NYPD officers posed with guns after deadly shooting New York City police officers walk through the Central Park Green a block from the site of a pair of shootings on a warm summer night in New York. (New York Times) The two guns recovered after the shootings were loaded with ammunition that can be purchased at Wal-Mart or online. Both guns could have been stolen. The gunman spent an hour in the park, shooting at random and twice shooting himself, according to a police source with knowledge of the investigation. The gunman's motives were unclear. "He said he was angry," Sgt. Edward DelValle told The Times. "He just wanted to kill someone." The police source did not know if the gunman meant any of the victims he shot at, or if it was meant to be a warning to the public. "We're not going to f678ea9f9e
